

Dear Prospective Installer,

August 17, 2011

Thank you for your interest in becoming an Authorized Installer of the Honeywell Wind Turbine by WindTronics, Inc. WindTronics requires certified electricians to install the wind turbine and inverters. The Quick Start Guide has been developed for a Licensed Electrician to manage the installation independently.

Please review the following information which is available at [www.windtronics.com](http://www.windtronics.com). These informational tools ensure that you are always connected to WindTronics and also help to promote your business:

1. [Introduction to the Honeywell Wind Turbine for Dealers and Installers](#) – This is recommended viewing for all contractors who will be installing and promoting the Honeywell WT6500 Wind Turbine. Go to [www.windtronics.com](http://www.windtronics.com) and click on the video link for *Installers and Dealers*. In this 45-minute video you will learn:
  - How to discern if your area is a good candidate for a wind turbine
  - Why the Honeywell Wind Turbine is Like No Other
2. *WT Installer Locator* – The WindTronics website contains an Installer Locator. This great tool provides all customers access to Authorized Installers in their local area.

To begin the application process, please **complete the attached application form AND provide the following three (3) items:**

1. Scanned copy of your current **Contractor's License**
2. Scanned copy of your current **Proof of Liability Insurance\*** with WindTronics named as an additional insured
3. \$200 **registration and processing fee** (please make checks payable to: WindTronics Inc.)

Once we receive your payment, the requested documents, and have verified the information, you will be notified of your confirmed status as an Authorized WindTronics Installer.

If you are also interested in becoming a Dealer, please send your request to Jennifer Luttrull at [JenniferL@windtronics.com](mailto:JenniferL@windtronics.com). If you become an Approved Dealer before you become an Authorized Installer, the registration fee will not apply as Dealers are required to provide installation services.

Thank you again for your interest in the Honeywell Wind Turbine manufactured by WindTronics and we look forward to hearing from you.

Sincerely,

*Del Loomis*

**WindTronics, Inc.**
