

# Ventilation Exhaust Cleaning

**FIELD'S**  
Fire Protection, Inc.

NFPA 96 requires you to perform ventilation hood cleaning of kitchen hoods, fans, and ductwork at regular intervals as determined by NFPA 96 and the local AHJ. Hood Cleaning will be performed on a Semi-Annual basis, unless otherwise noted.

- Wrap and protect all equipment.
- Clean and remove grease from fan(s).
- Clean and remove grease from all duct work.
- Clean and remove grease from hood(s).
- Inspect and clean at all access panels.
- Clean all filters.
- Polish the stainless steel hoods and backsplash.
- Clean up work area.
- Clean the kitchen floors.

*Other Services Offered:*

- Install hinge kits for fans. (NFPA requirement)
- Install grease containment system to protect roof.
- Add access panels to ductwork.
- Furnish new filters and globes.
- Before and after photos available upon request.
- Upon completion of cleaning, applicable documents and noted deficiencies shall be left at location and available electronically.
