8800 Yamaha Runner Series

With every new ski produced by our OEM's comes a new runner. This 8800 series goes on the new Yamaha Mountain ski to protect the ski and provide traction.

90 Piece Kit

After observing the number of 1.25" lug tracks taking 90 studs (34 models in 2017 alone), Woody's produced this traction kit for your convenience. This kit includes 90 studs, round support plates, and big nuts. Single-ply tracks will take the Grand Master® kit, while two-ply tracks will take the Gold Digger® Traction Master® kit.

Gold Digger® Traction Master® Kit:
GDPK-1325-90S

Grand Master® Kit:
GMPK-1325-90
